## MULTI-VITIS 6

**Several advantages in only one solution!**

- Articulated sprayer with pneumatic atomization LINK with distribution sprayhead 6 hands 4 cannons and hydraulic movement, for treatments on vineyards in espalier with paths every 3 rows (width between rows from 2 to 3 metres).
- The simultaneous covering of the 6 sides is guaranteed by the working process of the 6 hands (for the two complete internal and external rows) and the 4 cannons (for the two internal sides of the adjacent rows).
- The uniformity of the spraying and covering of the foliage is guaranteed by the action of the opposing air flows: the lower hands of each side (with 4 diffusers each) work with the same and opposite flow respected to the hands at the top (with 4 diffusers too), which are adjustable in height, width and direction.
- The two intermediary hands guarantee an effective coverage of the top of the rows.
