

SYNERGY BETWEEN PRECISION, SUSTAINABILITY AND RESOURCE CONTROL

cima® SYNERGY

SPECIFICATIONS:

- **Designed for vineyards:** focused and precise treatments.
- **Telescopic and wrap-a-round distribution sprayhead:** solid as well lightweight structure for stability during use.
- **Hydraulic adjustment:** adjustable drops according to the planting system layout.
- **3 drops with tilt-adjustable hands:** effective distribution of the product, minimizing the drift effect.
- **Simultaneous treatment of three rows:** inter-row width from 2 to 3 metres, for a significant saving of time.

TECHNICAL INFORMATION:

- **Tank capacity:** 800 – 1000 Narrow - 1000 – 1500 – 2000 liters
- **EU Road Circulation “Mother Regulation”**
- **Tractor required power:** at least 58 kW - 80 HP
- **For rows with a maximum height of:** 2,80 m
- **Minimum overall dimensions:** width 2.48 m - height 2.90 m
For storage, transport, and road transport

ADVANTAGES:

Significant versatility in field

Resources optimization, reduction of waste and environmental impact

Accuracy of the quantities distributed

Treatment effectiveness and cost savings

High operating efficiency

Effective solution for a sustainable agriculture
