

## ROB3

### The evolution of the wrap-a-round boom

- Completed with a software control system to open and close the arms and to adjust the delivery automatically
- No worries in adjusting the drops height, very easy manoeuvrability in turning radius
- Equipped with a leverage system to cover 3 rows simultaneously up to 3 metres wide
- Made of a central turret (with diffusers) mounted on the sprayer and 2 drops with diffusers assembled on the arms that fold separately
- The spraying system is equipped with the well-known CIMA diffusers, based on the Venturi tube principle for the atomization of the chemical product.
